Researching generalization in reinforcement learning to build agents that adapt robustly to unseen, diverse settings

EDUCATION

Korea Advanced Institute of Science & Technology (KAIST), South Korea — Aug 2022 — Aug 2024
Master of Science in Computer Science — Cumulative GPA: 3.95/4.30
Thesis Title: "Strategic Dreaming in MBRL: Leveraging State Space Structure for Sample-Efficient Generalist Agents"
Supervisor: Prof. Sungjin Ahn

Innopolis University, Russia — Aug 2018 — Aug 2022
Bachelor of Computer Science (Robotics track) — Cumulative GPA: 4.68/5.00
Thesis Title: "Learning behavioral strategies for multi-robot system in a predator-prey environment"
Supervisor: Prof. Alexandr Klimchik & Consultant: Prof. Stefano Nolfi

EXPERIENCE

Generative Bionics — Genoa, Italy
Research Engineer — Jan 2026 — Present

- Develop reinforcement learning algorithms for humanoid locomotion.
- Design and apply sim-to-real transfer strategies to improve real-world robustness.
- Deploy and validate learned policies on physical humanoid robots.

Artificial and Mechanical Intelligence Lab, IIT — Genoa, Italy
Research Fellow (PI: Prof. Daniele Pucci & co-PI: Giulio Romualdi & Giuseppe L'Erario) — March 2025 — Dec 2025

- Developed torque-control humanoid locomotion policies using reinforcement learning.
- Designed and implemented RL experiments for ErgoCub with IsaacLab.
- Built a Sim-to-Real transfer framework to enable robust humanoid locomotion.

University of Alberta & Amii — Remote
Research Assistant (PI: Prof. Rupam Mahmood (UoA) & Colin Bellinger (NRC)) — Feb 2025 — Present

- Assisted in research on mask-based goal representation for robot learning, conducting experiments with multiple open-vocabulary object detection models to assess their effectiveness (In submission: [P2]).
- Investigated model-based and model-free reinforcement learning algorithms for Sim-to-Sim transfer with finetuning in the target domain.

Machine Learning & Mind Lab (MLML), KAIST — Daejeon, South Korea
Graduate Student Research Assistant (PI: Prof. Sungjin Ahn) — Nov 2022 — Feb 2025

- Researched zero-shot task generalization in model-based RL, leading to a state-of-the-art agent (Publication: [C1]).
- Explored intrinsic motivation in hierarchical model-based RL, focusing on how high-level policies guide low-level policies.
- Worked on diffusion-based planning for long-horizon tasks while learning on short trajectories (Publication: [C2])

Unmanned Technology Laboratory, Innopolis University — Innopolis, Russia
Junior Developer (Industry Oriented) — June 2021 — June 2022

- Developed ROS packages for various drone modules, including gimbal control, RTK GPS, and payload control.
- Integrated Livox lidar with the lab's drone for outdoor mapping.
- Developed a handheld Lidar device for indoor/outdoor mapping for an industrial partner (results).

Center of Robotics, Innopolis University — Innopolis, Russia
Undergraduate Research Assistant (PI: Prof. Sergei Savin) — Aug 2019 — April 2021

- Conducted RL experiments for a stabilizing control policy of a tensegrity hopper (Preprint: [P1]).
- Designed and implemented a contactless differentiable physics simulator for tensegrity robots using Taichi.
- Performed research on sim2real transfer for a three-prism tensegrity robot.

AWARDS

- ICML Travel Grant 2024
- KAIST Graduate School Full Scholarship (Master) 2022-2024
- Outstanding Achievements at Innopolis University Fall 2020
- Outstanding Contribution to Science at Innopolis University 2020, 2021
- 3rd place DOTS competition from Bristol Robotics Lab and Toshiba June 2021
- Innopolis University Full Scholarship (Bachelor) 2018-2022

Teaching Experience

- TA in CS492 "Deep Reinforcement Learning", KAIST Spring 2023
- TA in "Introduction to ROS" course, Innopolis University Summer 2022

Academic Service

- **Conference Reviewer:** ICLR (2024-2026), IROS (2024), ACML (2024), Humanoids (2025), AAAI (2026)
- **Workshop Reviewer:** ICML AutoRL (2024)
- **Journal Reviewer:** IEEE RA-L (2024-2025)

EXTRACURRICULAR ACTIVITIES

Korea Science and Engineering Fair (KSEF) South Korea
Judge 2022, 2023

- Conducted technical interviews with the participants.
- Judged the research reports and participants' presentations.

World Robotics Olympiad (WRO) International Finals
Judge 2022 - 2024

- Developed the game rules of the international competition for the "Advanced Robotics Challenge (ARC)" category.
- Served as a head judge for the Russian qualifications.
- Served as a judge for the international compeitition in Győr, Hungary.
